

UK Public Sector Data

The officers (non elected) side of the Government, covering:

Central Government

Local Government

Regional Government/QUANGOS

Housing Associations

Criminal Justice

The MOD

Notes:

General

1. There is a cross over between the functions. Simply adding up the counts will not necessarily give an accurate volume.
2. The seniority values aren't necessarily comparable from one area of the Government to another e.g. 'Second Tier' contacts in a Government Department will be more 'senior' than their equivalent in Primary Care Trusts albeit they are both two levels from the CEO.
3. Board Members (Chairman/Elected Members/Committee Members/Non-Executive Directors) have been excluded from the following counts on the basis of providing 'management' only contacts. Details are available if required.

Counts for Central Government contacts

c. 3250 contacts, covering all Senior Management (with the exception of a few functional contacts) across all Institution types.

Counts for Local Government contacts

c. 20,201 contacts, covering all Chief Execs/Corporate Directors/Top Tier officers and almost complete Second Tier coverage plus coverage of all key functions across all organisation types listed above. Specific functional contacts supplied on separate document. Branch Libraries haven't been included in these counts – the management contacts are listed, but in addition we have over 3300 Branch Libraries on the database if required.

Counts for contacts in Regional Government/QUANGOS

c. 1902 contacts, covering all Chief Execs/equivalent for listed above. Seniority is less relevant here due to the size of the organisations. Some key functional contacts are also covered.

Counts for contacts in Housing Associations

c. 4817 contacts. Due to the nature of the subject data the field structure is different to the other data sets, field names and data is consistent across the common fields so would not present a problem for merging with our other data sets but would require dedicated fields to provide full information.

Counts for the MOD

c. 240 sites. Data consists of very basic site information only, which can be top-lined as required. Due to the nature of the subject data the field structure is different to the other data sets, field names and data is consistent across the common fields so would not present a problem for merging with our other data sets but would require dedicated fields to provide full information.

Counts for Central Government

Institutions

Departments (including Devolved Government – NAW/Scottish Executive/NIO)	58
Executive Agencies	139
